

**Do you need a doctor?** The Town of Fort Erie's Community Health and Wellness department is trying to establish the number of people in Fort Erie that need a family doctor. By keeping track of the people in Fort Erie who need a family doctor we can ensure we are trying to recruit enough doctors to fill the need in our community.

If you and/or other members of your household need a family doctor, please complete the information below and return to the address below. If you would like us to forward your contact information to a family doctor who is currently accepting patients, or the nurse practitioner, please indicate that in the space provided and sign to acknowledge that we will be sharing your contact information with only one doctor or the nurse practitioner.

If you have any questions about this process please contact Community Health and Wellness at 905-871-1600 ext 533.

The completion and submission of this form does not necessarily mean that you will get a doctor.

(Detach and save this section for your information)
